DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Group I, Claims 1, 3, 8, 10, 15, 17, 22, 24 and 34-35, in the response filed August 29, 2005 is acknowledged. The traversal is on the ground(s) that the inventions are not both independent and distinct. Applicants further assert that a search for Group I would be co-extensive with a search for Groups III and IV. This is not found persuasive because the separate classification of the groups is only one indication of the burdensome nature of the search involved. The literature search, particularly relevant in this art, is not co-extensive and is much more important in evaluating the burden of search. Clearly different searches and issues are involved in the examination of each group.

Accordingly claims 1, 3-4, 8, 10-11, 15, 17-18, 22, 24-25, 32-35, 38, and 44-45 are pending in the instant application, of which claims 4, 11, 18, 25, 32-33, 38, and 44-45 have been withdrawn from further consideration as being drawn to a non elected invention.

The requirement is still deemed proper, and accordingly made FINAL.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

1. Claims 1, 3, 8, 10, 15, 17, 22, 24, and 34-35 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 1, 3, 8, 10, 15, 17, 22, 24, and 34-35 are directed to antibodies which have the same characteristics and utility as those found naturally and therefore does not constitute as

patentable subject matter.

In the absence of the hand of man, naturally occurring products are considered non-statutory subject matter. Diamond v. Chakrabarty, 206 USPQ 193 (1980). Mere purity of naturally occurring product does not necessarily impart patentability. Ex parte Siddiqui 156 USPQ 426 (1966). However when purity results in new utility, patentability is considered. Merck Co. V. Chase Chemical Co. 273 F. Supp 68 (1967). See also American Wood v. Fiber Disintergrating Co., 90 US 566 (1974); American Fruit Growers v. Brogdex Co. 283 US 1 (1931); Funk Brothers Seed Co. V. Kalo Inoculant Co. 33 US 127 (1948). Filing of evidence of a new utility imparted by the increased purity of the claimed invention and amendment to the claims to recite the essential purity of the claimed products is suggested to obviate this rejection. For example, "An isolated antibody..."

Claims 1, 3, 8, 10, 15, 17, 22, 24, and 34-35 are free of the prior art of record.
